#### **Solution Architecture:**

The solution architecture for the Cryptocurrency Tracking Application ensures a scalable, efficient, and user-friendly platform for tracking real-time cryptocurrency market data, trends, and analytics.

## **Goals of the Solution Architecture:**

Identify the Best Tech Solution:

• Utilize modern front-end frameworks (React.js) and APIs (RapidAPI, CoinGecko) to provide a seamless and interactive crypto market tracking experience.

#### Define Structure & Characteristics:

• Ensure a modular, scalable, and maintainable software architecture that supports future feature enhancements like Al-based price predictions and DeFi analytics.

### Outline Features & Development Phases:

• Clearly define project milestones, including UI/UX design, API integration, database structuring, and deployment strategy.

## Establish Specifications for Development & Delivery:

- Provide well-defined guidelines for system architecture, API integrations, data flow, and real-time data handling.
- Implement a high-performance backend to support large-scale user requests without delays.
